P. ROHITH KUMAR (23102A040016)

B. NIYAZ BASHA(23102A040467)

From

MOHAN BABU UNIVERSITY

User Story:

As a sales representative, I want to efficiently identify and manage potential leads using our AI-Powered Lead Generation System to streamline my sales process, easily capturing and updating lead details while categorizing leads as Hot, Warm, or Cold along with their product interest for personalized and prioritized outreach; I also need the application to automatically generate an AI-powered summary of each lead's background, company, and engagement status so I can quickly understand a prospect without manually reviewing every field, while validating incoming lead data by rejecting personal email domains to ensure only genuine business contacts are captured and records remain accurate and reliable, and providing role-based access so Lead Managers and Sales Agents see only the leads and permissions relevant to their responsibilities for organized team collaboration, and lastly, automatically sending email notifications to leads as soon as their record is created or updated, informing them that their information has been received and that a representative will follow up shortly, enhancing responsiveness and lead engagement.

1. INTRODUCTION

1.1 Project Overview :

The project “An AI-Powered Lead Generation System” focuses on developing a platform to identify, capture, score, and nurture sales leads efficiently across companies, campaigns, and individual contacts. The system automates lead discovery and qualification, maintains lead records, generates reports, and improves engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document.

1.2 Purpose :

The purpose of this project is to:

- Streamline lead discovery and qualification
- Automate lead scoring and prioritization
- Improve data accuracy
- Enable data-driven decision-making
- Enhance lead engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer)

PS	I am	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representative	Identify quality leads quickly	I spend hours manually researching prospects	Lead data is scattered across many sources	Stressed and inefficient
PS-2	Marketing Manager	Track campaign-generated leads	Conversion insights are delayed and incomplete	Leads are not centrally scored or stored	Confused and dissatisfied
PS-3	Prospect / Lead	Receive relevant offers and follow-up	I do not get timely engagement	There is no automated nurture process	Disconnected and undervalued

Problem Statements – AI-Powered Lead Generation System					
PS	I am	I'm trying to	But	Because	Which makes me feel
PS-1	 Sales Representative	Identify quality leads quickly	I spend hours manually researching prospects	Lead data is scattered across many sources	 Stressed and inefficient
PS-2	 Marketing Manager	Track campaign-generated leads	Conversion insights are delayed and incomplete	Leads are not centrally scored or stored	 Confused and dissatisfied
PS-3	 Prospect / Lead	Receive relevant offers and timely follow-up	I do not get timely engagement	There is no automated nurture process	 Disconnected and undervalued

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate lead data and scoring
Hear	Feedback from leadership on pipeline health
See	Multiple spreadsheets and disconnected tools
Say & Do	Manually research and log lead information
Pain	Errors, delayed follow-up, missed opportunities
Gain	Automation, accurate scoring, faster reports

Empathy Map Canvas – AI-Powered Lead Generation System

2.3 Brainstorming

Brainstormed Ideas

- Manual lead tracking
- Spreadsheet-based lead management
- Basic web form capture only
- Rule-based static lead scoring
- AI-powered lead generation and scoring system

2.4 Selected Idea:

An AI-Powered Lead Generation System that automatically captures, enriches, scores, and nurtures leads.

3 REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Customer Journey Stages

1. Login
2. Access AI Lead Generation System
3. Capture & Enrich Lead Data
4. AI Lead Scoring & Prioritization
5. View Reports & Dashboards
6. Automated Engagement
7. Decision Making & Conversion

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login
FR-2	Lead & Company Data Capture
FR-3	Data Enrichment and Validation
FR-4	AI-Based Lead Scoring
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements

NFR-1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements:

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter lead details, and view a prioritized list within a few minutes without help.

NFR-2: Security

The system must protect lead and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery

Examples:

- User roles and permission levels
- Field-level and record-level restrictions
- Restricted access to sensitive contact data
- Secure login and password policies

NFR-3: Reliability

The system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable hosting environment

Example:

If a user enters lead data and the connection drops, the system should preserve the information and restore it later.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay in lead scoring

Example:

When a manager generates a monthly pipeline report for hundreds of leads, the report should load within 2–3 seconds.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example:

Managers should be able to access the system during peak business hours, weekends, or late nights.

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing lead volume
- Expandable storage
- Maintain system speed

Example:

If the business expands to new regions, the system should support thousands of leads without slowing down.

3.3 Data Flow Diagram

User → Web Application → Lead & Company Records → Validation Rules → AI Scoring Engine → Automation Rules → Reports → Dashboards.

3.4 Technology Stack

Layer	Technology
Frontend	Web-based Dashboard
Backend	Application Server / REST API
Database	Cloud Database
AI / Scoring Engine	Machine Learning based Lead Scoring Model
Automation	Workflow & Notification Engine
Analytics	Reports & Dashboards

4 PROJECT DESIGN PHASE

4.4 Problem–Solution Fit

The system replaces manual, spreadsheet-based lead tracking with automated data capture and AI-driven scoring. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely prioritization of the highest-value leads.

4.5 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the system using valid credentials.
Lead Record Management	Enables users to create, view, update, and delete lead details such as name, contact number, and job title.
Company & Campaign Management	Allows management of company account information and marketing campaign / lead-source data for business operations.
Lead Capture	Supports capturing leads from web forms, imports, and third-party integrations.
AI-Based Lead Scoring	Automatically calculates a lead priority score using formula-driven logic based on engagement signals.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, company registration number, and tax ID.
Lead Categories & Views	Provides different lead categories (Inbound / Outbound) and tailored views for different lead types.
Standardized Value Lists	Maintains standardized values for fields such as industry, engagement signal, and lead type.
Email Notification System	Sends automated emails to leads once they cross a hot-lead score threshold, with tailored offers.
Workflow & Automation	Automates tasks such as updating records and triggering notifications on a schedule.
Report Generation	Generates detailed reports on leads, companies, and campaign performance.
Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the cloud.
User Role Management	Controls system access using roles and permission levels for different users.

4.6 Solution Architecture

Architecture Layers

- Presentation Layer – Web Dashboard
- Application Layer – Business Logic & Automation
- AI / Scoring Layer – Lead Scoring Models
- Data Layer – Lead, Company, and Campaign Records
- Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

5 PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A development environment and project repository were set up first.
- Data models were designed to store lead, company, and campaign data.
- Application modules and a unified dashboard were developed for easy navigation.
- Fields, relationships, and standardized value lists were configured to ensure data consistency.
- Views and lead categories were created based on lead source and type.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated workflows were developed for lead notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

5.2 Product Backlog, Sprint Schedule, and Estimation

Use the below template to create product backlog and sprint schedule

Sprint	Epic	USN	User Story / Task	Points	Priority	Member
Sprint-1	Environment Setup	USN-1	As an admin, I want to set up the AI-powered lead generation system so development can begin.	5	High	Pasupuleti Rohith Kumar
Sprint-2	Lead Management	USN-2	As a sales representative, I want to capture and manage lead and company information.	4	High	Pasupuleti Rohith Kumar
Sprint-3	AI Lead Scoring	USN-3	As a system, I want to automatically score and prioritize leads using AI.	5	High	Niyaz Basha
Sprint-4	Automation	USN-4	As a system, I want to send automated email notifications to hot leads.	4	High	Niyaz Basha
Sprint-5	Reports & Dashboards	USN-5	As a manager, I want reports and dashboards to monitor lead performance and make decisions.	5	High	Pasupuleti Rohith Kumar

Project Tracker, Velocity & Burndown Chart:

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	5	5 Days	22 JUN 2026	27 JUN 2026	5	14 JUL 2026
Sprint-2	4	5 Days	27 JUN 2026	1 JUN 2026	4	14 JUL 2026
Sprint-3	5	4 Days	01 JUN 2026	05 JUL 2026	5	14 JUL 2026
Sprint-4	4	5 Days	06 JUN 2026	09 JUL 2026	4	14 JUL 2026
Sprint-5	5	5 Days	10 JUN 2026	14 JUL 2026	5	15 JUL 2026

6 PROJECT DEVELOPMENT PHASE:

Milestones – AI-Powered Lead Generation System

1. Requirement Analysis & Planning

- Understanding Business Requirements
- Defining Project Scope and Objectives

2. Backend Development & Configuration

- Sign up for Salesforce Dev Org Account Setup
- Custom Objects Creation (Lead, Company, Campaign)
- Tabs Creation
- Fields and Relationships
- Validation Rules
- Flows & Automation
- Agentforce Configuration

3. UI/UX Development & Customization

- Profiles
- Users
- Roles
- Page Layouts and Navigation

4. AI Lead Management & Automation

- AI-Based Lead Scoring
- Lead Prioritization
- Automated Email Notifications
- Workflow Automation

5. Data Migration, Testing & Security

- Data Import & Migration
- Functional Testing
- Validation Testing
- Security & Role-Based Access Control

6. Deployment, Documentation & Maintenance

- Production Deployment
- User Documentation
- Conclusion

Project Implementation Flow

- **Milestone 1:** Development Environment Setup
- **Milestone 2:** Requirement Analysis & Project Planning
- **Milestone 3:** Custom Tabs and Lightning App Components
- **Milestone 4:** Application Configuration & Navigation
- **Milestone 5:** Custom Objects, Fields & Relationships
- **Milestone 6:** Validation Rules & Data Security
- **Milestone 7:** Creation of Lead Manager & Sales Agent Profile
- **Milestone 8:** Roles Control Lead Manager & Sales Agent
- **Milestone 9:** User Profiles & Permissions
- **Milestone 10:** Flows & Testing
- **Milestone 11:** Agentforce, Reporting & Deployment
- **Milestone 12:** Project Conclusion

What you'll learn

- Real-Time Salesforce Project Development
- Requirement Analysis and Project Planning
- Salesforce Administration and Configuration
- Custom Objects, Fields, and Relationships
- Lightning App, Tabs, and Page Layout Creation
- Validation Rules and Flow Automation
- AI-Powered Lead Scoring using Agentforce
- Lead and Campaign Management
- Workflow Automation and Email Notifications
- Reports and Interactive Dashboards
- User Profiles, Roles, and Security
- Data Migration and Testing
- Deployment and Maintenance
- Best Practices for AI-Based Lead Generation System

Implementation:

Milestone 1 - Development Environment Setup:

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details:
 - 1) First name & Last name : PASUPULETI ROHITH KUMAR
 - 2) Email : Work Email
 - 3) Role : DEVELOPER
 - 4) Company : MOHAN BABU UNIVERSITY
 - 5) Country : India
 - 6) Postal Code : 517501
 - 7) Username :In format [username@organization.com](#)

Click on sign me up after filling these.

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required
- ✓ Drag-and-drop when you want it, Apex when you need it
- ✓ 60+ MCP tools and 30+ coding skills, ready out of the box

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name: PASUPULETI ✓ Last name: ROHITH KUMAR ✓

Job title: DEVELOPER ✓ Company: Mohan Babu University ✓

Country/region: India ✓ Work email: pasupuletirohithkumar6@... ✓

☒ I agree to the [Main Services Agreement – Developer Services, Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

Sign me up

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.
2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

Milestone 2: Requirement Analysis & Project Planning :

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. On the Object Manager page, click Create | Custom Object.

Field Label	API Name	Data Type
Lead Score	Lead_Score__c	Number
Lead Category	Lead_Category__c	Picklist (Hot, Warm, Cold)
Product Interest	Product_Interest__c	Picklist(Training, Consulting, Certification)
AI Summary	AI_Summary__c	Long Text Area

Activity 1 : Create Lead Score Field

- From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - Label** : Lead Score
 - Plural Label** : Lead_Score__c
 - Enter Record Name Label and Format

Record Name : Lead Score

Data Type : Number

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Activity 2 : Create Lead Category Field

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- Data Type: Picklist
- Click Next
- Field Label: Lead Category
- Record Name: Lead Category
- API Name: Lead_Category__c

Picklist Values:

- Hot
- Warm
- Cold
- Click Next
- In Field-Level Security, check the Visible checkbox.
- Click Next
- Select the required page layouts.
- Click Save.

The screenshot displays the Salesforce Setup interface for defining a custom field. The browser address bar shows the URL: `orgfarm-0016cc9643-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/Lead/FieldsAndRelationships/00Ng50000MZmeb/view`. The page title is "Lead Custom Field: Lead Category".

Navigation: The left sidebar shows the "Setup" menu with "Object Manager" selected. The main content area is titled "Lead" under "SETUP > OBJECT MANAGER".

Field Information:

Field Label	Lead Category	Object Name	Lead
Field Name	Lead_Category	Data Type	Picklist
API Name	Lead_Category__c		
Description

Data Owner			
Field Usage			
Data Sensitivity Level			
Compliance Categorization			
Created By	PASUPULETTI ROHITH KUMAR, 7/2/2024, 4:32 AM	Modified By	PASUPULETTI ROHITH KUMAR, 7/2/2024, 4:32 AM

General Options:

- Required: ☐
- Default Value:

Picklist Options:

- Restrict picklist to the values defined in the value set: ☒
- Controlling Field:

Picklist Values Used:

Active and inactive picklist values: 3 (1,000 max)

Field Dependencies:

No dependencies defined.

Validation Rules:

No validation rules defined.

Buttons: New, Reorder, Replace, Printable View, Chart Colors.

Activity 3 : Create Product Interest Field

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- Data Type: Picklist
- Click Next
- Field Label: Product Interest
- Record Name: Product Interest
- API Name: Product_Interest__c

Picklist Values:

- Training
- Consulting
- Certification
- Click Next
- In Field-Level Security, check the Visible checkbox.
- Click Next
- Select the required page layouts.
- Click Save.

The screenshot displays the Salesforce Setup interface for defining a custom field. The browser address bar shows the URL: `orgfarm-0016cc9643-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/Lead/FieldsAndRelationships/00Ng500000MYzmW/view`. The page title is "Lead Custom Field Product Interest".

Navigation: The left sidebar shows the "Setup > OBJECT MANAGER" path. The "Lead" object is selected, and the "Fields & Relationships" tab is active.

Field Information:

Field Label	Product Interest	Object Name	Lead
Field Name	Product_Interest	Data Type	Picklist
API Name	Product_Interest__c		
Description			
Help Text			
Data Owner			
Field Usage			
Data Sensitivity Level			
Compliance Categorization			
Created By	PASUPULETI ROHITH KUMAR	Modified By	PASUPULETI ROHITH KUMAR
	7/2/2026, 4:35 AM		7/2/2026, 4:35 AM

General Options:

- Required: ☐
- Default Value:

Picklist Options:

- Restrict picklist to the values defined in the value set: ☒
- Controlling Field:

Picklist Values Used:

Active and inactive picklist values: 3 (1,000 max)

Field Dependencies:

No dependencies defined.

Validation Rules:

No validation rules defined.

At the bottom, there are buttons for "New", "Recorder", "Replace", "Printable View", and "Chart Colors".

Activity 4 : Create AI Summary Field

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - Data Type: Long Text Area
 - Click Next
 - Field Label: AI Summary
 - Record Name: AI Summary
 - API Name: AI_Summary__c
 - Length: 32000
 - Visible Lines: 5
 - Click Next
 - In Field-Level Security, check the Visible checkbox.
 - Click Next
 - Select the required page layouts.
 - Click Save.

The screenshot displays the Salesforce Setup interface for creating a custom field. The breadcrumb trail is 'SETUP > OBJECT MANAGER > Lead'. The left sidebar shows the 'Fields & Relationships' menu. The main content area is titled 'Lead Custom Field AI Summary' and includes a 'Back to Lead Fields' link. Below the title are tabs for 'Field Information', 'Set Field-Level Security', 'View Field Accessibility', and 'Where is this used?'. The 'Field Information' tab is active, showing a table with the following details:

Field Label	AI Summary
Field Name	AI_Summary
API Name	AI_Summary__c
Description	
Help Text	
Data Owner	
Field Usage	
Data Sensitivity Level	
Compliance Categorization	
Created By	PASUPULETI ROHITH KUMAR 7/2/2026, 4:37 AM
Modified By	PASUPULETI ROHITH KUMAR 7/2/2026, 11:38 AM

Below the table are sections for 'General Options' (Default Value), 'Long Text Area Options' (# Visible Lines: 6, Length: 32,768), and 'Validation Rules' (No validation rules defined). A 'New' button is present in the Validation Rules section. At the bottom, there is a 'Back To Top' link and a note: 'Always show me more records per related list'.

Milestone 3: Custom Tabs and Lightning App Components:

A Tab in Salesforce provides quick access to an object or feature. Tabs improve navigation by allowing users to directly access records without searching through Object Manager.

To create a tab in Salesforce:

Setup → Tabs → New → Select Object (e.g., Custom Object) → Choose Tab Style → Enter Description (optional) → Assign to Profiles → Save.

Activity-1: Create a Label and Tab Style:

Developer Edition

Search Setup

Setup Home Object Manager

User Interface

Rename Tabs and Labels

Tabs

Didn't find what you're looking for? Try using Global Search.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Content (standard__Content)	☒
Analytics Studio (standard__Insights)	☒
Sales Console (standard__LightningSalesConsole)	☒
Service Console (standard__LightningService)	☒

Milestone 4: Application Configuration & Navigation :

A Salesforce application is a collection of tabs, objects, and tools grouped together to help users complete specific business processes. It provides a dedicated workspace where users can access all related data—such as accounts, contacts, opportunities, dashboards, or custom objects—without searching across the system. Applications can also be customized with logos, colors, and layouts to match an organization's branding while improving user experience and efficiency.

To create an application in Salesforce:

Setup → App Manager → New Lightning App → Enter App Details → Choose Branding → Add Navigation Items → Add Utility Items (optional) → Assign to Profiles → Save & Finish

Milestone 6: Validation Rules & Data Security:

Activity 1: To create a Validation rule to Lead Object

Go to **Setup** → click on **Object Manager** → type **Lead** in the search bar → click on the **Lead** object.

1. Click on Validation Rules → click on New.

2. Enter the Rule Name as Reject_Personal_Email.

3. Check Active.

4. Insert the Error Condition Formula as:

```
OR(  
CONTAINS(Email, "@gmail."),  
CONTAINS(Email, "@yahoo."),  
CONTAINS(Email, "@hotmail."),  
CONTAINS(Email, "@outlook.")  
)
```

5. Enter the Error Message as: **“Personal email domains like Gmail, Yahoo, Hotmail, and Outlook are not allowed.”**

6. Select the Error Location as Email.

The screenshot shows the Salesforce Setup interface in Developer Edition. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Scoping Rules, Object Access, Field Access, Triggers, Flow Triggers, Validation Rules, and Conditional Field Formatting. The main content area is titled 'SETUP > OBJECT MANAGER' and 'Lead'. It displays the 'Validation Rule Edit' form. The 'Rule Name' is 'Reject_Personal_Email', and the 'Active' checkbox is checked. The 'Error Condition Formula' is entered as:

```
OR(  
CONTAINS(Email, "@gmail."),  
CONTAINS(Email, "@yahoo."),  
CONTAINS(Email, "@hotmail."),  
CONTAINS(Email, "@outlook.")  
)
```

 The 'Error Message' is 'Personal email domains like Gmail, Yahoo, Hotmail, and Outlook are not allowed.' The 'Error Location' is set to 'Field' and 'Email'. The 'Check Syntax' button shows 'No errors found'. The bottom of the form has 'Save', 'Save & New', and 'Cancel' buttons.

7. Click Save.

Milestone 7: Creation of Lead Manager & Sales Agent Profile :

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. Profile controls “Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges. You can define profiles by the user's job function. For example, System Administrator, Developer, Sales Representative.

Activity 1: Create Lead Manager Profile

1. Go to **Setup** → type **Profiles** in Quick Find → click **Profiles**.
2. Click Clone next to Standard User.

3. Enter:

- Profile Name: **Lead Manager Profile**

4. Click Save.

5. Edit the profile:

- Under Object Settings, enable Read, Create, Edit, Delete access for:
 - Lead
 - Task
 - Event
 - Contact
- Enable Modify All on Lead (optional based on requirement)
- Ensure API Enabled is checked

6. Click Save.

Activity 2: Create Sales Agent Profile

1. Go to **Setup** → **Profiles**
2. Click Clone next to Standard User

3. Enter:
- Profile Name: **Sales Agent Profile**

4. Click Save

5. Edit permissions:

- For Lead → allow Read, Create, Edit
- Remove Delete permissions
- Allow access to: Task, Event
- Ensure View Reports is enabled

6. Click Save

Milestone 8: Roles Control Lead Manager & Sales Agent:

A role in Salesforce defines a user's record-level data visibility.

Roles control who can see whose records in the organization hierarchy.

Activity 1: Create Lead Manager Role

1. Go to **Setup** → type **Roles** in Quick Find → select **Roles**
2. Click Set Up Roles.
3. Click Add Role under the Sales Team hierarchy
4. Enter:
 - Role Name: **Lead Manager**

- Role Label: **Lead Manager**
- Parent Role: **VP of Sales** (or any upper-level role)

The screenshot shows the Salesforce Setup interface. The top navigation bar includes a hamburger menu, a 'Developer Edition' badge, a search bar labeled 'Search Setup', and several utility icons. The left sidebar contains a search bar with 'users' and a list of navigation items: Users (expanded), Analytics Groups, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles (highlighted), User Management Settings, Feature Settings, and Data.com. The main content area is titled 'Roles' and shows the 'New Role' form. The form fields are: Label (Lead Manager), Role Name (Lead_Manager), This role reports to (VP, North American Sales), and Role Name as displayed on reports. At the bottom of the form are buttons for Save, Save & New, and Cancel.

Milestone 9: User Profiles & Permissions:

Activity 1: Create Lead Manager User

1. Go to **Setup** → **Users** → **New User**

2. Fill in:

- First Name: Lead
- Last Name: Manager
- Alias: lead
- Email: pasupuletirohithkumar6@gmail.com
- Username: (salesagent@test.com)
- Nickname: leadmanager
- Role: Lead Manager
- User License: Salesforce
- Profile: Lead Manager Profile

3. Click Save

The screenshot shows the Salesforce Setup interface for the 'Users' section. The left sidebar contains navigation links for Setup Home, Salesforce Go, Service Cloud Reports, Release Updates, Lightning Usage, AgentExchange Offers, Sales Cloud Everywhere, and ADMINISTRATION. Under ADMINISTRATION, the 'Users' link is selected. The main content area displays the 'Lead Manager' user profile. At the top, there are tabs for 'Edit', 'Change Password', and 'View Summary'. Below this, the 'User Detail' section shows various fields for the user, including Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Address, Time Zone, Locale, Language, Delegated Approver, Manager, and various permissions and settings. The user's email is 'pasupuletirohithkumar6@gmail.com' and the username is 'leadmanager99@test.com'. The role is 'Salesforce' and the profile is 'Lead Manager Profile'. The user is a 'Marketing User' and has various permissions enabled, including 'Receive Approval Request Emails', 'App Registration: One-Time Password Authenticator', 'App Registration: Salesforce Authenticator', 'Security Key (U2F or WebAuthn)', 'Lightning Login', 'Temporary Verification Code (Expires in 1 to 24 Hours)', 'Accessibility Mode (Classic Only)', 'Debug Mode', 'High-Contrast Palette on Charts', 'Load Lightning Pages While Scrolling', 'Salesforce CRM Content User', 'Receive Salesforce CRM Content Email Alerts', 'Receive Salesforce CRM Content Alerts as Daily Digest', 'Make Setup My Default Landing Page', 'Allow Forecasting', 'No MRU Updates', 'Call Center', 'Phone', 'Extension', and 'Fax'.

HI PASUPULETI,

Thanks for signing up for a Developer Edition. Now you can start building on Salesforce for free and get hands-on with Agentforce and Data Cloud.

There's just one more step. Use the following link to reset the password for your Developer Edition. This link expires in 24 hours.

[Reset Password](#)

To easily log in later, save this URL:

<https://orgfarm-0016cc9643-dev-ed.develop.my.salesforce.com>

Here's the username for your Developer Edition:

pasupuletirohithkumar06.6571dae781a9@agentforce.com

Your Developer Edition, now enabled with Agentforce and Data Cloud, remains active as long as you continue to use it. It expires after 45 days of non-usage.

Again, welcome to Salesforce!
Developer Relations

Activity 2: Create Sales Agent User

1. Go to **Setup** → **Users** → **New User**

Milestone 10: Flows & Testing:

10.1 Steps to Create the Record-Triggered Flow

1. From Setup, in the Quick Find box, search for Flows.
2. Click New Flow.
3. Select Category: Triggered.
4. Select Type: Record-Triggered Flow.

5. Configure the Start Element:

- Object: Lead
- Trigger: A record is created or updated
- Entry Condition Requirements: (example based on common lead email use cases—adjust to match your flow)
- Optimize the Flow For: Actions and Related Records
- When to Run the Flow: Run Immediately

6. Click Done.

7. Add the Email Action Add the Send Email Action

7.1 Click the + icon below the Start element.

7.2 Select Action.

7.3 In the Action search bar, type: Send Email

7.4 Select: Send Email 7.5 Configure the action fields:

- Label: Send Lead Email
- Subject: (enter your email subject)
- Body: {{\$Record.Name}}
- {{\$Record.AI_Summary__c}}
- Recipient Addresses: (enter email formula or field reference; e.g., {{\$Record.Email})
- Sender Type: Org-Wide Email or Default
- Is HTML Body: True
- RecordId → {{\$Record.Id}} (if included in your setup)

8. Click Done and Activate.

10.2 Testing:

To Do List

10.3 Email Verification & Validation:

Milestone 11: Agentforce, Reporting & Deployment:

Activity 1 : Create Prompt Template

1. Click the Gear Icon → Select Setup.
2. In the Quick Find box, search Einstein Setup.
3. Click Einstein Setup.

4. Enable Turn on Einstein.
5. Refresh the page after enabling Einstein.

Prerequisite: Create AI_Summary__c Field

Before selecting the field in Prompt Builder, you must create the AI Summary Custom field in the Lead Standard Object.

Steps:

1. Click Gear Icon → Setup.
2. In Quick Find, search Object Manager.
3. Select Lead
4. Click Fields & Relationships → New.
5. Select Long Text Area → Click Next.
6. Field Label: AI Summary API Name auto-populates as AI_Summary_c
7. Set Length = 32000 and Visible Lines = 5–10.
8. Click Next → Save.

AI Summary

Summary of Lead: Bertha Boxer

Lead background and company information.

Einstein - AI Summary Field

Name: bertha boxer.

- Company: Farmers Coop. of Florida.
- Company sector: Unknown.
- Role: Unknown.
- Source: Web.

Contact details:

- Email: bertha@fcf.net.
- Phone: (850) 644-4200.

Status and engagement:

- Current status: Working - Contacted.
- Engagement stage: Active outreach confirmed; initial contact has occurred.
- Potential interest level: Unknown. No explicit indication of interest provided.

Communication history and key notes.

- Contact attempts: Contact has been made and the lead is in a working stage. Specific dates, channels, outcomes, and responses are not provided.
- Notes provided: [Provide(DESCRIPTION)]. The placeholder indicates additional descriptive information was not supplied. No other remarks are available.

Actionable recommendations.

- Confirm missing details. Request Bertha's role, decision-making authority, and specific needs to qualify the opportunity.
- Capture engagement details. Record date and channel of initial contact, response summary, and any next steps agreed upon.
- Assess interest and timing. Ask about timeline, budget parameters, and priorities to determine fit.
- Schedule follow-up. Propose a clear next action and timeframe for follow-up communication.

Acknowledgment.

- Thank you for your time. Please provide any additional description or interaction notes to complete the lead profile.

To Do List

Milestone 12 - Project Conclusion:

In conclusion, the development of the AI-Powered Lead Generation System marks a significant stride in enhancing lead discovery, qualification, and nurturing. Seamlessly integrating company details, lead information (both inbound and outbound), and campaign data, this system streamlines business processes and enables informed decision-making.

The automation of lead scoring, including engagement tracking and priority calculation, reduces manual effort and empowers the sales team to focus on delivering exceptional service. Moreover, automated email notifications for hot leads foster timely, personalized communication and enhance conversion rates.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, the system was verified across the following areas to confirm correct behavior:

- Record creation for Company, Lead, and Campaign accounts
- Validation rule testing for registration number, tax ID, and phone number
- Verification of lead categories and views
- Formula field validation for lead score, priority value, and hot-lead flag
- Workflow execution for hot-lead email alerts
- Report and dashboard generation

Performance testing ensured fast response time and system stability during concurrent usage.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized lead data management
- Reduced manual research work
- Automated, consistent lead scoring
- Improved lead engagement
- Real-time pipeline analytics

Disadvantages

- Requires ongoing data quality maintenance
- Internet / cloud dependency
- Limited offline access

9. CONCLUSION

The AI-Powered Lead Generation System successfully improves business operations by integrating lead, company, and campaign data, automating scoring, and enabling intelligent reporting. The system reduces manual effort, saves time, and enhances lead engagement through automation and analytics.

10. FUTURE SCOPE

- Mobile application integration
- Advanced AI-based conversion prediction
- WhatsApp / SMS alerts
- Integration with third-party marketing tools
- Multi-region / multi-team support
- Advanced lead profiling and segmentation
